Exchange to Shizuoka University, See The Different Culture and See the Different Me.

汪志穎 -M10403209-

First of all, I want to say it's a great honor to have this chance to be here with all of you in Shizuoka university. During this research exchange program, we not only can do the research exchange but also learn the Japanese culture as well. I really appreciate that. In fact, this is my third time to be in Japan. When the first time I came to EBARA Company for working as an intern, I deeply like Japanese culture. Include the work environment, Japanese courtesy culture and the most important is the "attitude". I really appreciate the working attitude of Japanese people. It's always to be step by step. Because in this way we can make sure everything will be correct in each procedure. However, this time I got the same feeling as the first time. Every equipment and tools in the laboratory are clean and tidy. Students concentrate on professional research. Present their own research report in detail. Everyone did a very great job in the exchange program.

During this journey, I left a lot of wonderful memories. We truly hope to have a long-term cooperation with Shizuoka University. Finally, thanks to all the members in Shizuoka University again. See you in Taiwan!!
